Implementation

Group 2 - The Debug Thugs

Bader Albeadeeni
Dan Hemsley
Jennifer Bryant
Oliver Elliott
Mathilde Couturier-Dale
Rosie-Mae Connolly
William Mutch

Third-Party Assets

Asset Name	License	Suitability Discussion
Top Down Pixel Art Horror	Open source, It is free to use for personal use on any engine **[1]**.	This pixel set provides a school horror theme, which is perfect for our game goal for 'escaping uni'. It is free to use and modifications are allowed, meaning it is flexible towards our ideas for the game.
Pixel Art Top Down Basic	Open source, It is free for personal or commercial use **[2]**.	This tile set is perfect for building the outside area of our game. The pack also includes basic sprites, but we have chosen not to use them for the moment.
House Interior Tile Set 32x32	Open source, It is free for commercial and non-commercial use **[3]**.	This pack is very suitable for building the interior of the university. We can use this pack to help build our events. It is modifiable which works well if there is anything we would like to change.
Protagonist Character	The Penzilla Design license grants royalty-free use of purchased assets for private and commercial projects **[4]**.	This sprite is suitable for our game and has been chosen by the team. The license is more complicated for this asset as it requires a two dollar fee **[5]**. The license states mandatory credit must be given ("Graphics created by Penzilla Design"). The license is non-transferable and requires public project links to be shared with the creator **[4]**.

Status of Implementation

Requirements that have not been implemented at all:

Requires that have not been implemented fully:
